Dear Abdullah,

New changes:

In `allow_eleave_request` procedure, the `p_checked_APP_EMP_CODE` will return the delegated emp if the suggested approver is on leave other wise MSG025 & MSG026 are revised and will be returned accordingly.

A new procedure is added to validate the research, and later can be used for further checks.

Currently is used to validate the research ID.

```
check_eleave_Research(p_research_code varchar2,  
p_leave_emp_code varchar2 , p_accept_yn out varchar2 , p_msg_eng out varchar2 ,  
p_msg_arb out varchar2 ) is
```

The MSG047 is added for invalid research id.

Please, check the new amendments

Regards, Saood Al-Hashmi
